Public event, everyone welcome

Dr Cathy Quinlan, the nephrologist leading the Melbourne Genomics Kidney Genetics Flagship will join Professor Melissa Little and Drs Lorna Hale and Sara Howden from The Kidney Development, Disease and Regeneration Laboratory at the Murdoch Children's Research Institute to describe how samples and data collected from KidGen multidisciplinary clinics throughout Australia might be used to further research into kidney disease.

This event will be designed for patients and the general community.

## Topics

- The Australian Genomics Research Program – bringing genomic medicine into patient clinics
- Kidney in a dish
- Modelling kidney disease in the laboratory
- Genome editing – Using CRISPR-Cas9
